

COMPLIMENTARY LIVE WEBINAR

# PRESS PAUSE ON THE PARVO PANIC!

## Preventing a Case from becoming an Outbreak

WEDNESDAY, DECEMBER 6

8:00 PM EST | 7:00 PM CST

SUNDAY, DECEMBER 10

8:00 PM EST | 7:00 PM CST

**Brian DiGangi**  
DVM, MS, DABVP

Dr. DiGangi is the Clinical Associate Professor of Shelter Medicine at the University of Florida. He obtained his DVM from the University of Florida in 2006 and pioneered a residency in Shelter Animal Medicine there in 2010, earning an MS in Veterinary Medical Sciences. He's published research on canine heartworm and feline adoption and contributed to textbooks on animal welfare and disease management.

Dr. DiGangi is the lead editor for "Animal Behavior for Shelter Veterinarians and Staff" and is dual board-certified by the American Board of Veterinary Practitioners. He's served on executive boards, including the Association of Shelter Veterinarians and the American Heartworm Society, and was the Senior Director of Shelter Medicine for the ASPCA.

Did your parvovirus case turn into a **parvovirus outbreak**? Do you want to learn how to **better manage canine parvovirus cases** without putting the rest of the population at risk?

Join us for this important webinar as we explore the current recommendations and discuss new tools for managing canine parvovirus in shelter environments. Learn how to plan for safe and successful case management by refining preventive care and biosecurity practices.

Leading shelter medicine expert Dr. Brian DiGangi will share techniques to prevent the disease from spreading through the population, move affected animals through the shelter systems quickly, and exciting new treatment options.
