# Identifying the Cat with Diabetes Mellitus

Veterinary technicians often develop a strong rapport and trusting relationship with pet owners. This uniquely positions them for effective discussions with owners of cats with diabetes mellitus. However, technicians must first be prepared to identify risk factors and signs of diabetes mellitus in cats. Join Dr. Cynthia R. Ward, VMD, PhD, DACVIM (SAIM), Professor Emerita, University of Georgia, to discuss strategies veterinary technicians can use to talk to cat owners about preventing and recognizing diabetes.

## In this webinar, you'll learn:

- How to recognize significant risk factors for the development of diabetes mellitus in cats
- Ways to describe clinical signs of diabetes mellitus in cats
- How to advise cat owners about ways to prevent diabetes mellitus

**This lecture is pending RACE approval for 1 CE hour.**

**Wednesday, November 6 at 8pm EST**
