

The background of the advertisement is a microscopic view of red blood cells, showing their characteristic biconcave disc shape and reddish-pink color. The cells are scattered across the white background, with some appearing in clusters and others individually.

**onsior**<sup>®</sup>  
(robenacoxib)

# Inspire more movement

**Onsior 6 mg tablets for cats**

Now approved for the treatment of pain and inflammation associated with acute or **chronic** musculoskeletal disorders.<sup>1</sup>

**Elanco**

# Onsior® (robenacoxib) offers convenience for vets and pet owners<sup>1,9</sup>

- Small flavoured tablets are easy to administer
- Can be given without food or with a small quantity of food
- Majority of cats can be treated with just 1 tablet per day
- Some cat owners prefer tablet medication to liquid<sup>2</sup>

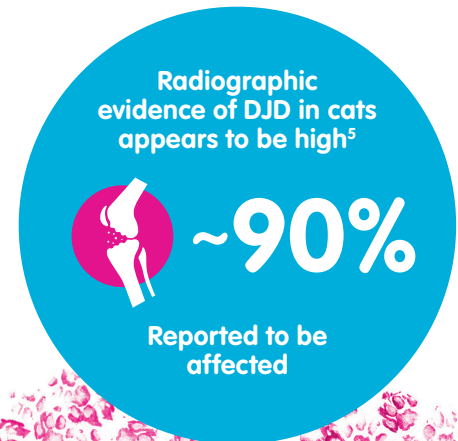

## Simple dosing:

Body weight (kg)	2.5 to < 6	6 to 12
Number of tablets		

## Indication for use:

Onsior (robenacoxib) 6 mg tablets for cats now approved for the treatment of pain and inflammation associated with **acute** or **chronic** musculoskeletal disorders (CMSD) in cats

# Long-term safety when cats with chronic musculoskeletal disorders received Onsior®<sup>8</sup>

Robenacoxib was well tolerated when administered orally for up to 12 weeks at the recommended therapeutic dose of 1 mg/kg day

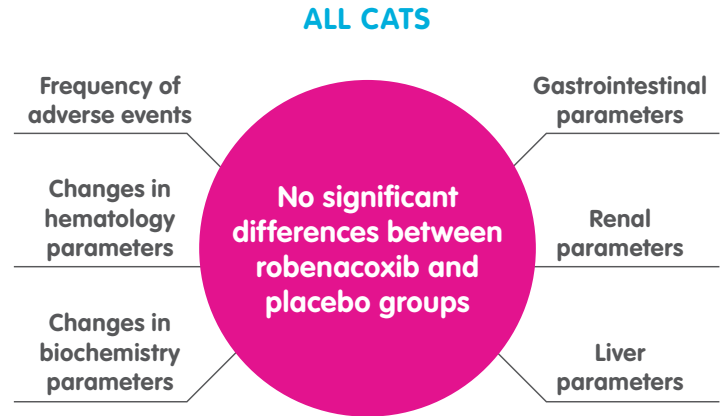

## Large sample size

- 494 cats evaluated<sup>†</sup>
- 267 cats received robenacoxib
  - 271 cats received placebo

## Combined analysis

- Four field studies evaluating cats with CMSD
- Prospective
  - Blinded
  - Placebo controlled

Onsior's chronic use indication now increases the range of available treatment possibilities for CMSD and has a high safety margin<sup>9</sup>. What will you choose for your next case?

# Field study results seen when 109 cats with chronic musculoskeletal disorders received Onsior vs. placebo<sup>6</sup>

## PET OWNER ASSESSMENTS

Pet owners saw the benefit of Onsior for their cats:<sup>†</sup>

### Client Specific Outcome Measure

- Impaired activities unique to the cat were assessed over time
- Significantly better performance of daily activities with robenacoxib over the 6 weeks of treatment

CSOM

**P = 0.01**

Pet owner assessment tool with reported reliability, responsiveness and concurrent validity<sup>9</sup>

A clinically meaningful reduction in disability with 6 weeks of robenacoxib treatment

**50%**

reduction in pain and disability

Temperament and happiness scores were also significantly ( $P < 0.05$ ) higher (better) with robenacoxib compared to placebo

## ACTIVITY MONITORING RESULTS

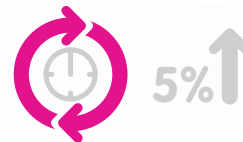

Innovative at home activity monitoring was used to measure benefits of Onsior

Cats spent approximately 80% of the day resting<sup>7</sup>

Marked improvement in pattern of activity from 8pm – 8am<sup>‡</sup>

Total activity counts (24 hour) were also higher with robenacoxib

Improvement in activity was seen within 3 weeks, and continued over 6 weeks

<sup>‡</sup>8 pm to 8 am assessment period. Cats are most active during the evening and early morning.

<sup>†</sup>Parallel-group comparison of groups over days 1-42. Owners blinded to treatment.

## Onsior 6 mg tablets for cats

Inspiring more movement and helping get cats back to doing what they love!
