

## Feline Enrichment Unleashed: Creative Strategies for a Healthier Cat

In recognition of National Pet Obesity Awareness Month, we are delving into creative enrichment strategies that can help cat caregivers manage their feline friends' weight and support their overall wellbeing. Although cats are motivated by treats, non-food enrichment is better, since more than half of cats are considered overweight or obese. Join Tabitha Kucera RVT, VTS (behavior), CCBC, KPA-CTP, Elite FFCP-V, to discuss a variety of non-food-based techniques designed to keep feline patients active, mentally stimulated, and engaged.

### In this webinar, you'll learn:

- How to apply creative non-food-based enrichment techniques to keep feline patients active and mentally stimulated
- Strategies for using enrichment techniques for effective weight management and overall feline wellness
- Practical tips for administering oral medications to ensure a low-stress experience for cats and their caregivers
- How to recognize risk factors of obesity for diabetes

**This lecture is RACE approved for 1 CE hour.**

**Thursday, October 24 at 8pm EST**
