

ASV AND ELANCO PRESENT:

PROTECTING OUR PUPS: STRATEGIES FOR BEATING PARVOVIRUS

Parvovirus is one of the deadliest diseases in dogs—but with the right strategies, it can be prevented and treated. Join this webinar with Dr. Brian DiGangi to explore disease prevention, control, and breakthrough treatments like Canine Parvovirus Monoclonal Antibody (CPMA).

**Thursday, November 13th
8:00 - 9:00 PM ET**

[Click here to register](#)
**Zoom link will be sent on 11/12
to registered email**

This program has been RACE approved for 1 hour of continuing education credit in jurisdictions which recognize RACE approval.

CPMA is USDA conditionally approved.
