

Leave it Better™

Supporting Continuous Improvement

Our Vision

The Leave it Better™ initiative is the overarching platform that supports Elanco's sustainability outreach.

For generations, producers have worked toward bettering their operations to create a healthy foundation for the future. Elanco is committed to building on these efforts and helping producers reach their goals by bringing sustainable solutions to operations, one product and tool at a time. We provide sustainability solutions for dairy, beef, poultry and swine operations.

Focus on Being a Supplier of Choice for Positive Change

Measurement

Creating baseline measures to help track customer performance and improvement.

Innovation

Customer solutions in the form of new animal health products, expertise and services.

Collaboration

Industry-wide connection and championing of the voice and license to operate of farmers and ranchers.

The Leave It Better™ initiative supports Elanco's Healthy Purpose™

Elanco's
**HEALTHY
PURPOSE™**

Elanco's Healthy Purpose is the organization's framework of commitments focused on advancing the well-being of animals, people and the planet in order to realize its vision of **'Food and companionship enriching life'**.

This initiative includes **Elanco's Planet Pledge to remove 21 million tons of emissions from customers' farms** while reducing Elanco's own impact on the planet.

Elanco™

Products and Services

Elanco's portfolio of products and tools helps support beef, dairy, poultry and swine producers reach their sustainability goals.

Ammonia Reduction

The first feed additive of its kind to reduce ammonia gas emissions from an animal and its waste.

Methane Reduction¹

Improves productivity on beef and dairy operations by allowing farms to produce more beef and dairy products using fewer natural resources.

Carbon Quantification

Allows producers to quantify the carbon footprint on their farm operation and monetize their carbon credits.

CO₂e Reduction

A unique and patented enzyme that aids in the reduction of CO₂e for swine and poultry operations.²

Improve Feed Conversion Ratio

Provides an increased rate of growth and improved feed efficiency in swine operations, reducing on-farm feed requirements.

Healthy Birds

A dual-action mixture that aids in the prevention of coccidiosis.

Maximize Profitability

A hands-free, on-chute technology that optimizes sorting decisions at the speed of processing.
