

Dairy Data Access System

HERD PERFORMANCE MADE CLEAR

A secure report package of herd performance data can be customized to evaluate numerous areas of performance and health. Our Elanco technical consultants help you analyze the information to find the insights that make a difference.

UP-TO-DATE DATA

The Dairy Data Access System enables you to quickly access your herd performance data through a report package so you always have the most recent data. And when you want to analyze past performance, our secure website keeps historical archives of backup data for that too.

THE MOST ADVANCED ANALYSIS

Using state-of-the-art tools and statistical platforms, our analysts don't just gather data for you — we help you make sense of it. Understand the insights that make a difference across a number of important areas like transition cow performance, disease effects, milk quality, reproductive efficiency, culling decisions and anything else you want to know.

BUILT TO YOUR SPECS

Our standardized report package provides a weekly analysis of many areas of performance and health. For even greater control, our Elanco representatives will work with you to customize the analysis and address any specific questions you want answered. Our system is made to be flexible to support each individual operation.

Contact your local Elanco sales or distributor representative to find the dairy report package that's right for your herd.

TRANSFORMING DATA INTO ANSWERS

Our portfolio of customizable services brings together the tools, the data and the expertise to help you optimize dairy management. From web-enabled applications to on-site consultations, our technical support team works closely with you to transform data analytics into decisive action. We take a full-circle approach tailored to meet the needs of each individual operation for solutions that fit.
