READ ENTIRE LABEL BEFORE USE.
May be harmful if swallowed.
FIRST AID If medical advice is needed, have product container or label at hand. Call a POISON CENTRE or doctor/physician if you feel unwell. For advice, contact the National Poisons Centre: 0800 POISON (0800 764 766) or a doctor.
ENVIRONMENTAL PROTECTION Harmful to aquatic life with long lasting effects. Harmful to the soil environment. Avoid contamination of any water supply with product or empty container. Avoid release to the environment. Collect spillage.
INDICATIONS To treat and control cobalt and selenium deficiency in sheep and cattle grazing cobalt- and selenium-deficient pasture.
DIRECTIONS FOR USE *By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label. Read package insert prior to use.*

By subcutaneous (under the skin) injection to be given into the anterior half of the neck.
DOSE RATE

Lambs	0.5mL	at tailing or weaning
Sheep	1 – 1.5mL	pre-lambing
Calves	2 – 3mL	from 2 months of age
Cows	4 – 6mL	pre-calving

- Cobalt deficiency in soil and/or pasture leads to a lack of Vitamin B₁₂ in body tissues of stock, which subsequently may have poor growth rates and ill thrift, particularly in young animals.
- Before treatment, establish pasture cobalt levels and/or Vitamin B₁₂ status of stock.
- Treatment of pregnant ruminants should benefit newborn animals, particularly when treated in latter stages of pregnancy.
- Supplementation of young ruminants should begin at or before weaning.
- Treatment is likely to last only 4 – 6 weeks if liver storage levels of Vitamin B₁₂ and pasture levels of cobalt are low.
- Seek veterinary advice if poor stock condition persists after treatment.

- Do not use this product unless animals are deficient in both cobalt and selenium.
- Do not re-dose with this product within three months of the previous dose.
- Within this period, re-treat with a non-selenised Vitamin B₁₂ supplement.
- Do not use at the same time as any other selenised fertiliser, prill or product and do not exceed the stated dose or frequency without consulting a veterinarian.

WITHHOLDING PERIODS Milk and Meat: **NIL**
STORAGE Store below 25°C. Protect from light.
DISPOSAL Preferably dispose of the product by use. Otherwise dispose of product and packaging in an approved landfill or other approved facility. Registered pursuant to the ACVM Act 1997, No A6903.
