

**250 Doses**  
**250 mL**

**Porcine Reproductive &  
Respiratory Syndrome Vaccine,  
Reproductive & Respiratory Form,  
Modified Live Virus**

**Prevacent™ PRRS**

For Use In Animals Only

**Indications:** This product has been shown to be effective for the vaccination of healthy pigs 2 weeks of age or older against PRRS respiratory disease; and against reproductive disease when vaccinated 6 weeks prior to breeding. The duration of immunity against respiratory disease is at least 26 weeks. The duration of immunity against reproductive disease has not been established. For more information regarding efficacy and safety data, go to [productdata.aphis.usda.gov](http://productdata.aphis.usda.gov).

Safety of this product has been demonstrated when sows or gilts are vaccinated prior to breeding or at any stage of pregnancy. Vaccine virus may be shed and transmitted to other populations of swine in contact with vaccinated swine. The duration of potential vaccine virus transmission may vary. Use of the vaccine in herds intended to remain PRRS virus seronegative is contraindicated. Introduction of vaccinated pigs into herds intended to remain PRRS virus seronegative is contraindicated.

**Dosage and administration:** Rehydrate with the accompanying sterile diluent. Shake well and draw back into the syringe the required amount. Administer 1 mL intramuscularly. The need for annual booster vaccinations has not been established for this product; consultation with a veterinarian is recommended.

**Precautions:** Store at 2°-8°C (35°-46°F). Do not freeze. Use entire contents when first opened. Do not mix with other products, except as specified on this label. In case of human exposure, contact a physician. Do not vaccinate within 21 days before slaughter. Inactivate unused contents before disposal. Anaphylactic reactions may occur. Symptomatic treatment; Epinephrine. Contains gentamicin as preservative.
