WARNING
TOXIC, EYE IRRITANT, ECOTOXIC
 Read label before use
Spinosad may cause target organ damage through prolonged or repeated exposure
Causes serious eye irritation
Toxic to aquatic life with long lasting effects
Very toxic to terrestrial invertebrates

Action: The active constituent in ExPO EXTINOSAD Pour-On is spinosad. Spinosad is a member of the "Spinosyn" class of insecticides; a new generation insecticide with a unique mode of action on the insect nervous system.

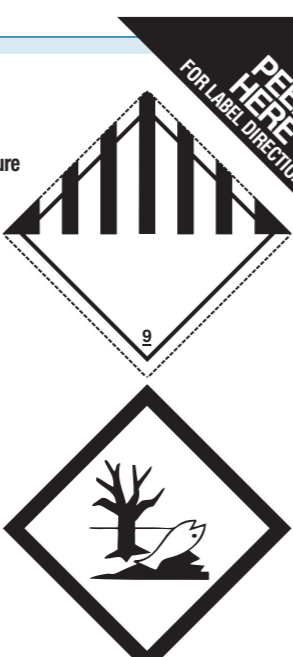

Safety Precautions and Directions
 Wash hands and exposed skin thoroughly after handling. Wear eye and face protection. Do not breathe the mist or spray.

First Aid
 If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. If eye irritation persists, get medical attention or advice. If swallowed, do not induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or contact a doctor if you feel unwell.

Environmental Protection
 Avoid contamination of any water supply or release to the environment of the product or empty container.

Disposal
 Preferably dispose of product by use. Otherwise dispose of product as part of an approved Agrecovery chemical disposal program. See www.agrecovery.co.nz for details. Triple rinse empty container. Spread rinsate from container onto waste ground or pasture. Recycle empty rinsed container at an approved Agrecovery recycling centre.

Emergency Response
 In case of spillage wear appropriate protective clothing and prevent material from entering water ways. Absorb spills with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely. For specialist advice in an emergency call 0800 CHEMCALL (0800 243 622). If additional hazard information is required, refer to the Safety Data Sheet. For a copy please go to www.elanco.co.nz.

Base

Dosage and administration fine woolled breeds of sheep off-shears treatment only

Body weight (kg)	Dose (mL)	This pack will treat (number of sheep)
20-25	12.5	800
26-30	16	625
31-35	19	526
36-40	22	454
41-50	25	400
51-60	30	333
61-70	35	285
>70	Add 2.5 mL for each 5 kg above 70 kg	

ExPO Extinosad Pour-On is spread over the body by passive diffusion and physical contact (e.g. rubbing with other sheep). To facilitate product movement, treated sheep should be penned closely and held in the yards immediately after application.

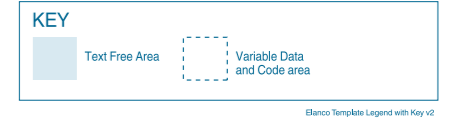

Emergency Treatment Coarse and Fine Woolled Sheep
 Apply a 50 mL dose to reduce louse numbers in severely infested long woolled sheep (>6 months after shearing). This dose should be applied as 4 x 12.5 mL bands (two bands on each side of the midline from the poll to the base of the tail).

GENERAL INFORMATION
 Optimum lice control requires the application of good agricultural practice. This includes ensuring a complete muster so that no animals remain untreated, attention to stock security following treatment, quarantine treatment of new stock arrivals, thorough and accurate dipping management and utilising the principles of Integrated Pest Management recommended by Wool Pro. DO NOT mix treated sheep with untreated sheep. It is good agricultural practice not to treat animals when they are wet or if rain is likely. However moderate rainfall following treatment does not adversely affect the effectiveness of the product. Prolonged heavy rain following treatment may reduce efficacy. ExPO contains a blue dye to identify treated sheep. The dye is scorable from the wool. Do not leave container, hose or applicator in the sun for long periods of time. At the end of use, clean out the applicator, nozzle and hose by pumping through with clean water.

DIRECTIONS FOR USE:
 For the control of lice on all breeds of sheep.

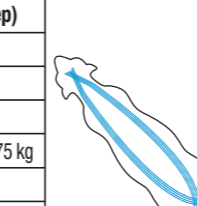

SHAKE CONTAINER GENTLY SEVERAL TIMES BEFORE USE
 By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.

Use any standard T-bar pour-on nozzle, and an applicator with a total adjustable volume ideally no greater than 20 mL.
 Do not under dose – check the accuracy of equipment before and during treatment.

Coarse wool breeds:
 Apply ExPO Extinosad Pour-On evenly along the backline from the poll to the base of the tail using a suitable applicator with a T-bar nozzle. In sheep weighing less than 35 kg apply as one band and in sheep weighing more than 35 kg, halve the dose volume and apply in 2 bands, approximately 5 cm either side of the midline of the back. This application pattern will improve the spread of the product.
 ExPO can be used on up to 3 month's wool growth, but for optimum results treatment is recommended off-shears.

Dosage and administration coarse woolled breeds of sheep

Sheep category	Body weight (kg)	Dose (mL)	This pack will treat (number of sheep)
Off-shears (within 24 hours after shearing)	<35	10	1000
	35-55	15	666
	55-75	16.5	606
	>75	Add 1 mL for each 4.5 kg above 75 kg	
Sheep from 24 hours to 3 months after shearing	<35	12.5	800
	35-55	17.5	571
	55-75	20	500
	>75	Add 1 mL for each 4 kg above 75 kg	

Fine wool breeds:
 Apply ExPO Extinosad Pour-On evenly along the backline from the poll to the base of the tail using a suitable applicator with a T-bar nozzle. In sheep weighing less than 25 kg apply as one band and in sheep weighing more than 25 kg, halve the dose volume and apply in 2 bands, approximately 5 cm either side of the midline of the back.
