

Tylan® Injection

Trusted by cattlemen for more than 30 years, Tylan® 200 Injection is a versatile, cost effective antibiotic used to treat cattle for pneumonia, foot rot, calf diphtheria and metritis.[†]

- **Fast-Acting** - For the treatment of pneumonia, Tylan moves to the lungs, where studies have shown it begins to accumulate within 30 minutes after injection.¹
- **Consistent** - On the market for over 30 years, Tylan Injection has delivered consistent efficacy for generations.
- **Cost-effective** - Tylan Injection has remained a cost-effective treatment option for producers within the macrolide drug class.

Tylan Injection Indications & Label Directions

Indications: In Beef Cattle and Non-lactating Dairy Cattle, Tylan 200 Injection is indicated for use in the treatment of bovine respiratory disease complex (shipping fever, pneumonia) usually associated with *Pasteurella multocida* and *Arcanobacterium pyogenes*; foot rot (necrotic pododermatitis) and calf diphtheria caused by *Fusobacterium necrophorum* and metritis caused by *Arcanobacterium pyogenes*.

Dosage: Inject intramuscularly 8 mg per pound of body weight one time daily (1 mL per 25 pounds). Treatment should be continued 24 hours following remission of disease signs, not to exceed 5 days. Do not inject more than 10 mL per site.

The label contains complete use information, including cautions and warnings. Always read, understand and follow the label and use directions.

WARNINGS: Not for human use. Keep out of reach of children. Cattle intended for human consumption must not be slaughtered within 21 days of the last use of this drug product.

This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. This product is not approved for use in calves intended to be processed for veal.
